Implementation framework for community-based geothermal development

Meta-database of geothermal projects

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement n° 857830.

Implementation framework for community-based geothermal development

Five fundamental aspects to consider for any geothermal energy project developed by a community of citizens

For whom?

Community investors & geothermal project developers

What is in it for you?

Access best practices for...

- **Characterising** geothermal projects
- Addressing **social aspects**
- Understanding **regulative frameworks**
- Implementing **innovative finance mechanisms**
- Analysing **alternative finance risks**

...and apply them to your own project!

Interactive guide to integrated finance in geothermal energy

Supporting you in the selection of the most suitable alternative financing and risk mitigation instrument

For whom?

Community investors & geothermal project developers

What is in it for you?

Our Guide offers you...

- Detailed information on integrated **financing solutions for geothermal projects**
- A questionnaire which will allow you to understand **key steps to be considered with regards to the finance model, community involvement goals, and risk aspects** in your geothermal project

Toolbox for risk-evaluation and mitigation

Perform a thorough economic modelling of your geothermal project – with or without community funding!

For whom?

Geothermal project developers

What is in it for you?

Our Toolbox offers you...

- Access to a questionnaire with all the parameters needed to perform a complete **economic modelling** of your geothermal project
- A first starting point to **reduce and mitigate the financial risks** relating to your project implementation

Meta-database of geothermal projects

Your platform of geothermal projects that are suitable for alternative financing schemes

For whom?

Community investors, geothermal project developers & local authorities

What is in it for you?

Our Database allows you to...

- Browse **geothermal projects** across Europe,
- Identify **initiatives for community financing**, and
- Register your project for **first-hand access** to services and networking

Decision tree

A workflow with questions on social, environmental, financial & risk factors to help you identify appropriate strategies for your project

For whom?

Local authorities & geothermal project developers

What is in it for you?

Our Decision tree...

- Highlights **likely concerns of your project** and their impact on the investment risk
- Recommends how to best address those concerns with regards to **financing, risk mitigation and social engagement**

Information catalogue for self-learning

Offering you in-depth information on anything relating to community financing & geothermal!

For whom?

Community investors & geothermal project developers

What is in it for you?

Wiki articles, technical reports, factsheets, and access to our related services.

FAQ

Answers to all your questions around community financing for geothermal projects

For whom?

Community investors

What is in it for you?

The FAQ offers you a quick overview of the most important information about **geothermal energy, alternative finance, risk mitigation, and social engagement**.
